# Introducción

Gamification as a didactic strategy for teaching/learning programming: a systematic mapping of the literature (Revelo, 2018)

# Introducción

- Formular el tema del trabajo
- Contextualizar el tema
- **Búsqueda** de distintas fuentes / Selección de palabras clave, autores, revistas/.../
  - libros, revistas, etc.
  - artículos de revista
  - recursos en Internet
- Evaluar los recursos encontrados
- Redactar el trabajo
- **Citar** los recursos seleccionados
- **Gestores de referencias bibliográficas permite manejar el gran volumen de información en:**
  - Catálogos
  - Bases de datos
  - Internet

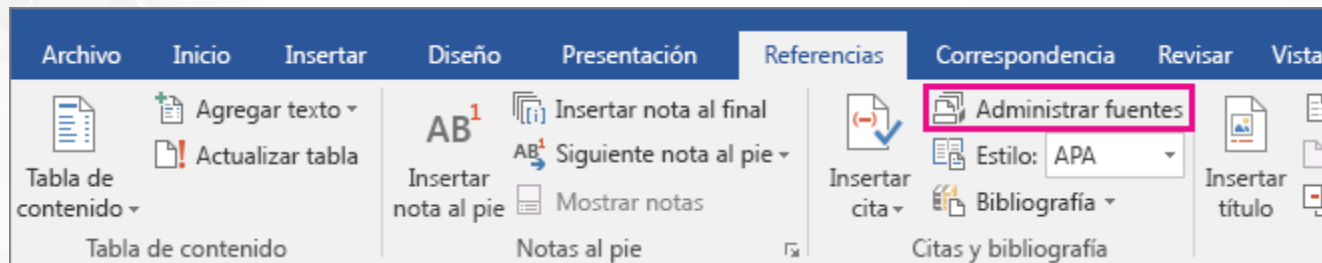

# Introducción

## **Para qué sirve un gestor de bibliografías?. Características comunes a todos ellos**

- Creación y mantenimiento de una bibliografía
- Agregar referencias, editarlas, añadir campos...
- Importar referencias de diferentes bases de datos en línea o catálogos de bibliotecas desde el gestor.
- Exportar referencias desde una base de datos concreta
- Exportar referencias desde Internet
- Importar referencias de archivos de texto
- Organizar las referencias
- Estrategias de búsqueda
- Generar bibliografías en diferentes formatos bibliográficos
- Modificar y personalizar formatos
- Compartir carpetas
- Citar mientras se escribe en un artículo. Intercalar citas y generar notas a pie de página y bibliografía final
- Lector de RSS (sistemas de alerta)

**Abstract:**  
Organizations, including universities, need to incorporate "Smart" technologies to take advantage of the capabilities they provide to transform their processes and drive new organizational models. At the international level, some examples have been given of universities that have developed the emerging concept of intelligent universities. At the Latin American level, by 2017, there were no consolidated bibliographical references on the subject. This article presents a characterization of two cases based on the analysis of the experiences presented by technology directors at events in Latin America and Colombia. This characterization allows us to conclude on the need for the alignment and integration of technology with the organization's processes, demanding greater

Conceptual framework for smart university

Rico-Bautista D

Journal of Physics: Conference Series

2019 vol: 1409 pp: 012009

Determine the potential value of the technology that an organization has, for example, the university, is an issue that is not easy to answer. The only way to look to the future, since there is no data, is to have a very good theory or model. The application of maturity models creates useful benefits. Its application covers a diversity of

# Crear y Usar Carpetas

The screenshot shows a list of folders in a system. The 'Unsorted' folder is highlighted with a red box and an arrow pointing to it from the text 'Registros no asignados a ninguna carpeta aparecen en **'Unsorted'**'. Below it are folders named 'Economics', 'Example', 'History', 'New Horizons', 'Nihilism', 'Philosophy', 'Politics', and 'Testing for Advisor'. The 'Create Folder...' option at the bottom is also highlighted with a red box and an arrow pointing to it from the text 'Use **'Create Folder'** para crear una nueva carpeta'. A third arrow points from the text 'Listado de las carpetas. Se pueden reorganizar arrastrándolas' to the list of folders.

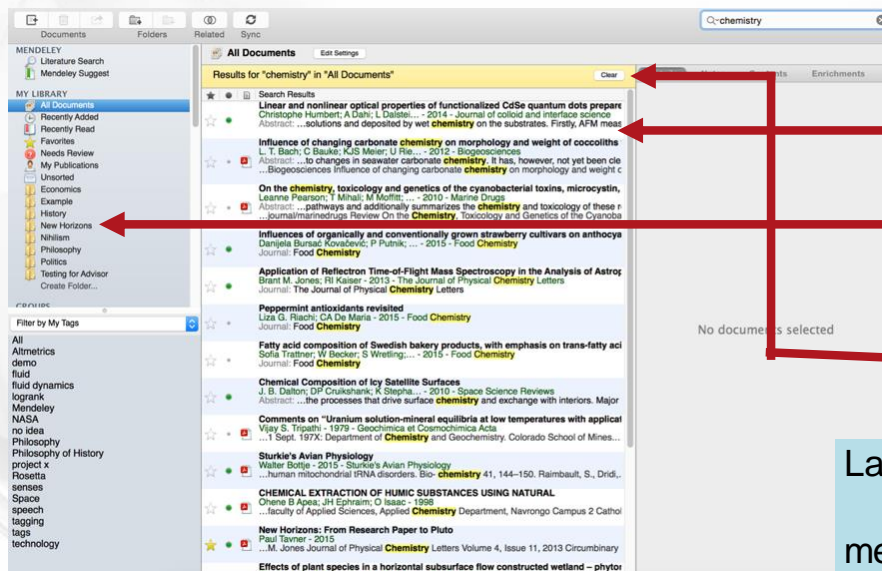

Registros no asignados a ninguna carpeta aparecen en **'Unsorted'**

La herramienta de búsqueda Mendeley, busca en los metadatos de las referencias y en el texto completo de los documentos PDF.

# El Visor de PDF

The screenshot shows a PDF viewer interface with a toolbar at the top (Pan, Highlight, Note, Select, Copy, Paste, Rotate, Zoom, Fullscreen, Sync) and a search bar. The document is titled 'New Horizons' and is a research paper by P. Tavner. The main content area displays the title, author, and abstract. The abstract describes the New Horizons mission, its objectives, and the instruments it carries. A diagram of the spacecraft is shown with numbered labels (1-8) corresponding to the list of instruments. The right sidebar contains details about the paper, including the author's name, a link to the research catalog entry, the year (2015), the number of pages, the abstract, tags, author keywords, city, institution (Mendelley), URL, catalog IDs, and files.

## New Horizons

The New Horizons mission received approval in November 2001<sup>1</sup>. Its objective was to send a spacecraft to Pluto - the only unexplored planet (still recognized as a planet at that time) in the solar system. Previous missions intended to reach Pluto - including *Pluto Fast Flyby* and *Pluto Kuiper Express* - had been cancelled, but after a thorough new profile selection process, NASA committed to launching *New Horizons* as part of its New Frontiers program.

Due to the distances involved - *New Horizons* would have to cover nearly three billion miles to reach its objective - the craft was designed to have as little mass as possible, but would be launched using the huge *Atlas V* expendable launch system. This guaranteed the greatest possible velocity for the craft.

When the mission launched on 19 January 2006, the probe left Earth on a solar system escape trajectory travelling at nearly 37,000 mph. It crossed the Moon's orbit just eight hours and thirty-five minutes after lift-off, and reached that of Mars only 78 days later. The probe gained a gravity boost from the gas giant Jupiter to accelerate past 51,000 mph, but would still have over eight years to travel to its objective. *New Horizons* is expected to make its closest approach of Pluto and its moons on July 14, 2015<sup>2</sup>.

1. **Radioisotope Thermoelectric Generator (RTG)**  
Provides electrical power produced using the decay of plutonium-238 fuel.
2. **Alice**  
A sensitive ultraviolet imaging spectrometer used to study atmospheric composition and structure.
3. **Ralph**  
Imaging apparatus used to photograph and map surface details during the encounter.
4. **Venetia Burney Student Dust Counter (SDC)**  
Designed by students at the University of Colorado at Boulder. Measures concentration of dust particles.
5. **Long Range Reconnaissance Imager (LORRI)**  
Camera and telescope apparatus used to take photos of target at longer ranges.
6. **Solar Wind Around Pluto (SWAP)**  
Instrument used to measure solar wind activity in the vicinity of Pluto. Also measures atmospheric escape.
7. **Pluto Energetic Particle Spectrometer Science Investigation (PEPSSI)**  
Directional energetic particle spectrometer. Used to study energetic particles in Pluto's atmosphere.
8. **Radio Science Experiment (REX)**  
Dedicated radio science experiment to study Pluto's atmosphere.

### Phoning Home

Communicating with a probe three billion miles from Earth poses a number of challenges for the *New Horizons* team. Luckily, they can rely on NASA's Deep Space Network

Year: 2015

Pages:

**Abstract:**  
NASA's New Horizons mission, part of the New Frontiers Program, is expected to reach its primary target - the dwarf planet Pluto - on July 14 2015. Mendelley was invited to visit NASA during the close approach of Pluto and will be at NASA HQ on the day of the encounter. This report was written to mark the occasion and to share our excitement at being present for the event.
